

I am retired and travel with our RV. Satilite Radio finally gives me a choice of "Non Screaming Music" And there is NO VOLUME change when a comercial comes on. Not like Radio and TV that the FCC allows.
TYhis applies to where I live as the only TV or real internet we can have is Satelllite. The same holds tru with our Satillite Radio as it allows us to enjoy the Music we want and news, weather when we want it.

Ther isn't a local Radioo station tha offers that including all we try on the road.

I urge NAB's petition 04-160 be REJECTED as it infringes on my right to listen to what I want when I want to.
